

Duplicate Protocols

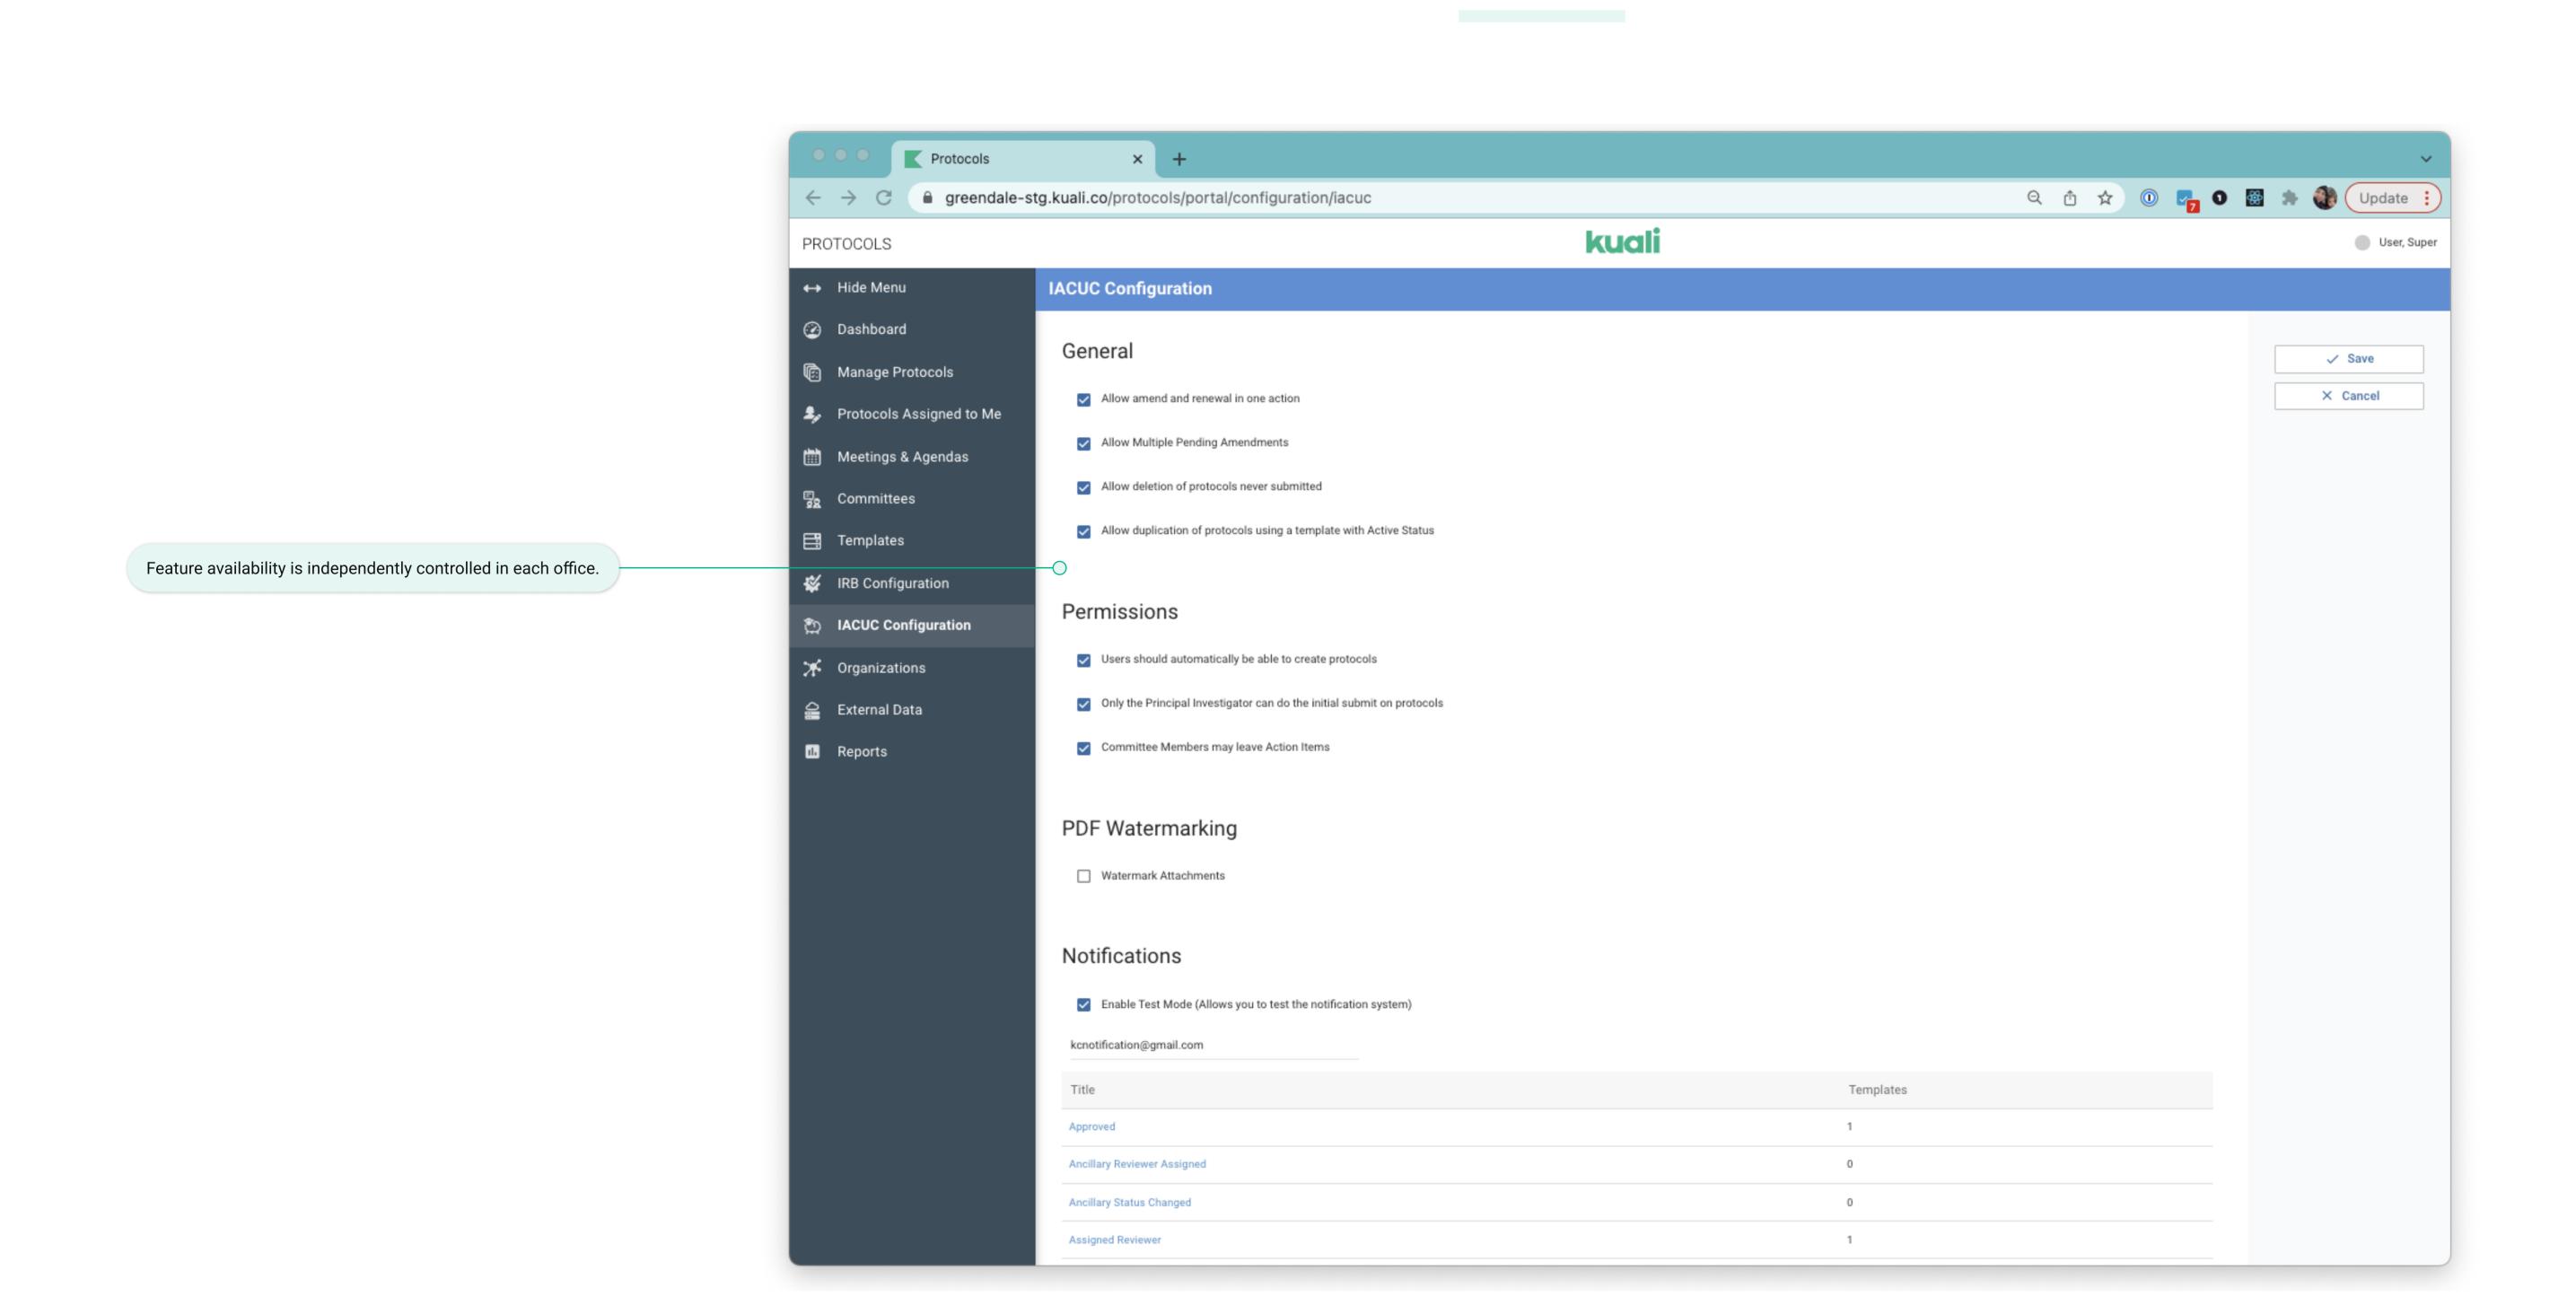

Released April 2022

Active Templates Only

Duplicating will only be available for protocols who are using a protocol template with Active status. This functionality will be expanded in the future for all protocols once we release ability to update all protocols to new, active templates. Since 30% of customers do not have a template versioning constraint, we dedecided to release this incremental portion for them to use immediately.

Data Copied

Only form data that would normally be manually entered during submission will be copied - anything a study team types into the Protocol Template after clicking the New Protocol button. **NOT Copied** Reviewing attributes not copied assigned reviewers review status action items admin form values Historical data not copied acitivty log viewing and editing permissions Attached forms using different templates not copied reportable events amendments renewals Attached files not copied Attachments Admin files & attachments
